

Array Questions

1. Create an array of 5 integers and print all elements.
2. Create an Array of 5 Strings and print the first and last element only
3. Create an array of 5 numbers(take input from users and store in array).

Your program should:

- Print the total number of elements in the array.
- Calculate and print the sum of all elements.
- Calculate and print the average of all elements.

Question 4

Write a Java program that asks the user to enter 5 student grades (out of 100) using Scanner. Store them in an array, then print each grade and the class average. (user should only be able to enter grades 0-100. It cannot be negative or more than 100)

Sample output

```
Enter grade 1: 85
Enter grade 2: 90
Enter grade 3: 72
Enter grade 4: 88
Enter grade 5: 95
```

```
--- Grade Report ---
Grade 1: 85
Grade 2: 90
Grade 3: 72
Grade 4: 88
Grade 5: 95
Class Average: 86.0
```
